AI for Productivity: Cursor, Copilot, Codex, Antigravity, Claude Code, opencode, Deepseek Harness
Programming Languages: Java (Basics), Python (Basics)

Languages

Hindi: Native
English: Professional Proficiency

Education

Indira Gandhi National Open University

Pursuing

Bachelor of Computer Applications (BCA)

Lal Bahadur Shastri Training Institute

Completed

Diploma in Information Technology (DIT)

1 Year Program

Work Experience

Web Developer Intern

August 2025 – November 2025

High Horse - Digital Marketing Agency

- Developed and managed web interfaces using HTML, CSS, JavaScript, React, Next.js, and Node.js for client projects
- Implemented n8n automation workflows to streamline internal processes and improve operational efficiency
- Worked with Shopify Liquid templates to customize e-commerce stores and enhance user experience
- Utilized Framer for interactive design prototypes and modern web experiences
- Integrated Three.js for creating interactive 3D experiences on client websites

Projects

mccode-plugin - npm Package for OpenCode | *TypeScript, npm, OpenCode, Effect*

- Published an open-source npm package extending OpenCode with AI-assisted Minecraft plugin & mod creation
- Supported Paper, Spigot, Purpur, and Folia plugins, Fabric/NeoForge mods, Skript scripts, Bedrock addons, and Discord bots
- Built with a modular TypeScript codebase exposing both Effect-based and Promise-based APIs

Stray Nodes - Minecraft Hosting Platform | *Next.js SSR, Tailwind CSS, AI Chatbot, MongoDB*

- Developed a full-stack game server hosting platform using Next.js with Server-Side Rendering for optimal performance
- Built comprehensive admin panel for content management including post creation, page editing, and plan management
- Implemented SEO configuration system within admin panel for meta tags, keywords, and search optimization
- Integrated AI-based support chat system and live chat for enhanced customer interaction
- Set up CI/CD pipeline using GitHub Actions for automated testing, building, and deployment

Riverview Homestay - Resort & Booking Platform | *Next.js, Tailwind CSS, React, Node.js*

- Designed and deployed a full-stack resort and homestay platform with room showcases and booking inquiry system
- Integrated admin and super admin with pms
- Integrated Dynamic Pages with customizable section and seo title etc
